linkedin.com/in/mattias-willner-904a0465

Senior product and transformation leader with 10+ years of experience across connected consumer products, digital workplace, internal tooling and complex delivery environments. Combines product strategy and roadmap ownership with practical cross-functional leadership - from customer experience and data to platform dependencies, governance and adoption.

CORE STRENGTHS Product Strategy & Roadmaps · Product Leadership · Digital Transformation · Internal Tooling & Workflow Design · AI-enabled Product Innovation · Cross-functional Leadership · Data & Experimentation · Governance, Privacy & Security · Vendor & Stakeholder Management

EXPERIENCE

Product Manager - Electrolux AB

2022-present

Own product strategy and roadmap for the Wellbeing domain in Electrolux OneApp, a shared mobile platform across iOS and Android.

- Lead prioritisation and delivery across mobile, backend, data, firmware, UX, legal and cybersecurity.
- Build connected-product experiences for air purifiers, ACs and robot vacuums, balancing multi-brand, multi-market, platform and device-release needs.
- Use analytics, customer insight and experimentation to guide decisions; work in an AI-enabled environment with Microsoft Copilot integrated into daily workflows, providing practical exposure to adoption, productivity use cases and human + AI ways of working.

Digitalisation Manager - Epidemic Sound

2020-2022

Led internal digitalisation through tooling, automation and workflow improvement; acting Head of Digitalisation during leave.

- Partnered across the organisation to map needs, prioritise initiatives and support adoption.
- Managed software budget, vendors and investments, connecting tool choices to business value and governance; planned and executed initiatives through yearly and quarterly OKRs.

Senior Consultant / Consultant - Acando & CGI

2016-2020

Product Owner for a Digital Workplace at Arbetsförmedlingen, leading a cross-functional team delivering a modern client platform and workspace used by thousands of employees.

- Also worked as agile coach and project manager for digital services and process development; service designer in healthcare; GDPR advisor for a housing organisation.

SELECTED AI & PRODUCT WORK

BikeMaster - Founder and product builder for a native iOS/watchOS connected cycling product. Uses GPS, IMU, sensors, weather and route intelligence; AI-assisted development accelerates delivery while core ride logic remains deterministic.

StoryTailor - Built an end-to-end service turning a spoken story into a printed children's book: transcription, story and character analysis, page structure, prompts, image generation, PDF/layout, payment and Lulu print fulfilment using multiple AI services.

Resume Agent - Want to know more? Reach out directly to me, or ask [Mattias' Resume Agent](#) - always available to answer questions about my experience, projects and working style.
