

Mattias Willner

PRODUCT & TRANSFORMATION LEADER

Stockholm, Sweden | [linkedin.com/in/mattias-willner-904a0465/](https://www.linkedin.com/in/mattias-willner-904a0465/)

PROFILE

Product and transformation leader with 10+ years of experience turning complex needs into useful digital products, services and ways of working. Combines product leadership, technical fluency and pragmatic delivery across connected consumer products, internal tooling and digital transformation. Hands-on interest in AI-enabled product development, with attention to quality, privacy, governance and human accountability.

CORE STRENGTHS

Product strategy and roadmaps • Product discovery, prioritisation and delivery • Digital transformation and internal tooling • Cross-functional leadership • Connected products and platform complexity • Data-informed iteration • AI-enabled product development and responsible adoption

EXPERIENCE

Product Manager - Electrolux AB

2022-present | Stockholm

Own product strategy and roadmap for the Wellbeing domain in Electrolux OneApp, a shared iOS and Android platform across multiple brands and markets. Lead delivery and prioritisation across frontend, backend, firmware, data, UX, legal and cybersecurity stakeholders. Build data-informed connected-product experiences for air purifiers, ACs and robot vacuums while balancing platform dependencies, device release rhythms and consumer experience quality.

Digitalisation Manager - Epidemic Sound

2020-2022 | Stockholm

Led digitalisation initiatives that improved internal workflows through software, automation and new tools. Partnered with teams across the organisation to map needs, prioritise opportunities and support adoption. Managed the software budget and vendor relationships, planned initiatives through OKRs, and covered Head of Digitalisation during leave.

Senior Consultant / Consultant - Acando & CGI

2016-2020 | Stockholm

Product, delivery and service-design roles in complex and regulated environments. Product Owner for a Digital Workplace at Arbetsförmedlingen, leading a cross-functional team delivering a modern client platform and workspace used by thousands of employees. Also worked as agile coach, project manager, healthcare service designer and GDPR advisor.

Business Analyst - ASKO AB

2015 | Malmö

Investment analysis and operational improvement work within product transportation.

SELECTED AI & PRODUCT WORK

BikeMaster. Founder and product builder for an active beta cycling companion. Developing local-first ride intelligence with explicit privacy, consent and data-minimisation boundaries; exploring a bounded AI explanation experience grounded in curated facts rather than raw telemetry.

StoryTailor. Solo builder of an end-to-end service that turns a parent-recorded story into an illustrated, print-ready children's book. Orchestrates transcription, structured story work, image generation, payment and print fulfilment. Key learning: multi-step AI requires quality checks and recovery paths.

Resume Agent. Conversational portfolio using retrieval over a maintained CV and case-study knowledge base. Designed to answer from supplied context, show sources and acknowledge gaps rather than guess.

EDUCATION & CREDENTIALS

Master of Science in Engineering, Lund University (LTH), 2010-2016 - Logistics & Production Management / Production Economics.

SAFe Agilist, Scrum, Digital Trust and Graphic Design. Swedish (native), English (fluent), Norwegian (working), Spanish (basic).
